

We understand business in Northern Ontario.

We really do. In fact it wasn't so long ago that we were Next Generation Consulting with just a couple of computers, a tiny little office and a total staff that would fit comfortably in a Volkswagen Beetle.

Today, Lucidia Technologies has grown into a sophisticated Northern Ontario-based Technology Integration firm with a mission to bring quality services and technological solutions to businesses. We offer a single point of contact for all of your technology related needs, whether that means advice, products or support.

In 2005 we entered the Enterprise Solutions Market Place by Partnering with Microsoft Business Solutions. Along the way we have evolved our technical services delivery method from Reactive to Proactive, culminating in 2007 with the deployment of our Managed Services solutions.

Our ultimate goal is to facilitate the growth of businesses in the North by offering innovative and cost effective solutions.

We would love to talk to you about what we can do for your business, whether you're a small shop with just a few PCs or a large corporation looking for some additional IT support.
